Automation Testing Projects:

Project 01:

- **Name:** Digital E Commerce and SAP.
- **Role:** Automation Test Engineer

Description: I led a project centered around the creation and automation of a telecom app known as "Digital Application."
This app serves customers with a diverse range of internet bundles and mobile packages across 13 regions.
The project was characterized by its integration with SAP, backend tool, which played a crucial role in approving customer requests originating from the Digital Application. My role encompassed the leadership of this end-to-end initiative, overseeing its development, implementation, and automation.

Project 02:

- **Name:** Cerillion CRM
- **Role:** Automation Test Engineer

<u>**Description:**</u>

Cerillion is customer relationship management software for managing customer's relations in a Telecom industry way. Cerillion is a custom-made solution for our client to assist its various business verticals like organization wide sales, marketing, customer support and inventory functions.
Cerillion is a tool which will be working only on IE browser, as the IE browser has retired, we were automating scripts in edge browser in IE mode.

Project 03:

- **Name:** Digital E Commerce (My Liberty and Flow Mobile app Android/IOS)
- **Role:** Mobile automation Test Engineer

<u>**Description:**</u> I led a project centered around the creation and automation of a telecommunication app known as "Digital Application." This app serves customers with a diverse range of internet bundles and mobile packages across ten distinct markets, including Jamaica, Panama, Trinidad, Tobago, Cayman, LCPR and etc.

Project 04:
- **Name:** Salesforce
- **Role:** Automation Test Engineer

<u>**Description:**</u> We had multiple projects in Salesforce, I was handling a POD "Self care portal" in classic version it is basically used for raising any complaints by customers and also solving the customer's queries through Chatting.
Having Functional knowledge on other 2 PODs Wholesale Legacy and Caribbean Legacy.

<u>**Roles and Responsibilities for the Projects:**</u>
- Discussing with the Test Leads to understand the Data Module and Functional knowledge.
- Developing the Automation scripts in a modularize and parameterized structure.
- Creating/Enhancing/Debugging/Executing scripts of Automation for Functional/Regression Testing.
- Co-ordinating with the Test team members and development team to resolve the issues.
- Handling changes and conducting the regression Testing.
- Prepare Automation Summary Reports to the Test Manager and Clients.
- Direct reporting to the client Automation progress/issues/blockers/weekly status.
